¹ Annual Percentage Yield (APY) refers to the dividends paid to an account. Dividends, when earned, are calculated on the average daily balance and are paid on the last day of the month. Dividends are compounded and credited monthly. Dividend rates are declared on dividend declaration date, which is the first day of the month. Dividends begin to accrue on the first business day when funds are deposited into the account. With the exception of Certificates of Deposit, members who close an account before the dividend declaration date will not receive that month's dividends. All accounts are subject to the requirements; terms and conditions found in the membership agreement established by the Board of Directors and may be listed as unavailable at any time and without prior notice. Other fees not listed on this sheet may apply. See specific account agreement for details.

Please note that not all credit union accounts are covered in this Rate and Fee Schedule. If you opened an account prior to September 1, 2007 and do not see it listed on this schedule, either contact the Credit Union or go online to access the Rate and Fee Schedule Supplement. The Supplement includes accounts that are no longer open to new members.
